School Improvement Plan Introduction

Lincoln Middle School

This school improvement plan was developed using a vision-based and data-driven process called *Vision-to-Action* that was developed by the Indiana Student Achievement Institute. In addition to containing the strategies our school and community identified as key to raising student achievement and closing achievement gaps in our school, this plan contains strategies that meet the expectations of:

- Indiana Student Achievement Institute
- Indiana Rules and Regulations

Participation

The following people were involved in developing this School Improvement Plan

- Teachers
- Students
- Parent representatives
- Community representatives

Process

Those involved in developing this School Improvement Plan participated in a series of discussions related to the *Vision-to-Action* steps:

1. Establish a local culture of high expectations
2. Create a common vision for student success
3. Analyze achievement data and set realistic data targets for each of the next three years
4. Analyze force field data and identify concerns within the following areas.
 - Academic expectations
 - Curriculum content
 - Instructional practices
 - Classroom assessment
 - Extra help
 - Student guidance
 - Learning environment
5. Research strategies to address our concerns and select high-leverage strategies to implement
6. Develop a to-do list for each strategy

Using Data for Decision-Making

The Vision-to-Action process relies heavily on data as a foundation for decision-making.

1. Achievement Data – To what degree are students prepared for success at the next educational level, and ultimately for success in postsecondary education and a global economy?
2. Force Field Data – What conditions in the school and community interfere with high student achievement?
3. Strategy Data – Is the strategy having the desired impact on adults and students?

Implementation Next Year

Our work next year will be guided by the to-do list that we have developed for each strategy.

Questions about the School Improvement Plan should be directed to the building principal.

Who Wrote this School Improvement Plan?

Many individuals were involved in the creation of this school improvement plan.

Groups and Roles

The **Steering Team** is comprised of educators, a parent, and a business representative. The Steering Team's role is to help the Full Faculty and Community Council 1) analyze data, 2) discuss key questions related to school improvement planning in an open and honest manner, and 3) reach consensus in decisions related to school improvement.

The **Full Faculty** is made up of all educators. The role of the Full Faculty is to 1) analyze data, 2) discuss key questions related to school improvement planning in an open and honest manner, and 3) reach consensus with each other and the Community Council for decisions related to school improvement.

The **Community Council** is comprised of parents and representatives of community stakeholder groups. All parents were invited to be part of the Community Council and any interested parent was welcome to join the Council. The role of the Community Council is to 1) analyze data, 2) discuss key questions related to school improvement planning in an open and honest manner, and 3) reach consensus with each other and the Full Faculty in decisions related to school improvement.

The **Student Body** includes every student enrolled in the school. The role of the Student Body is to 1) review data, 2) discuss key questions related to school improvement planning in an open and honest manner, and 3) provide input for the Full Faculty and Community Council.

Discussion Topics

The Full Faculty, Community Council and Student Body participated in guided discussions about the following topics. Written summaries of all discussions were developed and are on file at the school.

- Discussion 1: Global Economics
- Discussion 2: Vision for Student Success
- Discussion 3: Achievement Data Analysis and Achievement Goals
- Discussion 4: Force Field Data Analysis (student needs) and Areas of Concern
- Discussion 5: Strategy Selection

Vision Statement

The Vision Statement was developed by all educators, all students, and members of the community and is reviewed and updated annually. The foundation of the statement identifies the core convictions upon which this school improvement plan is built and answers the question, "What do our students deserve in order to be successful learners, responsible citizens, and productive members of a global economy?" The second part of the vision statement describes ideal adults who are striving to provide students with the things they deserve in order to achieve at a rigorous level. The third part of the vision statement describes ideal students in a school and community where adults live by their convictions. The last part of the vision statement includes ideal data that represent the community's dreams. This lofty data serves as the focal point for the remainder of the school improvement plan and requires the school and community to work toward every student succeeding at a high level.

We believe all students deserve:

a safe, clean, and positive learning environment free from ridicule and distinction based on their ethnic group, social background, or economic class and where they are accepted, respected, and treated with kindness by everyone. Students should be given responsibility and a voice in decisions and be held accountable for their choices. There are well-defined school-wide rules with appropriate consequences for violations of those rules. Students deserve to have a supportive home and community that is actively involved in their school, provides positive role models, and assists students in becoming successful in the work place, higher academic endeavors, or just life in general.

We believe that all students deserve a curriculum that is challenging yet attainable, uses a variety of instructional methods that accommodate different learning styles and to be assessed with a variety of assessment tools. Our students deserve to be instructed by enthusiastic, energetic, and passionate teachers who are well prepared and use research-based instruction in a student-centered classroom. We believe our students deserve to choose among a variety of opportunities for learning, both curricular and extra-curricular, that are not confined by scheduling issues or state standards, that are challenging and enjoyable, that foster critical thinking, and provide access to the most up-to-date technology available.

All adults in our community are living by these core convictions daily and as a result, show the following attitudes and actions:

All teachers, parents, and community members have high expectations for all students and value education with the utmost importance. They provide good role models and are goal oriented so students can achieve the highest success. To ensure all students learn, adults provide a safe and caring environment. All teachers are enthusiastic, compassionate, and knowledgeable in their field of study. Teachers use a variety of methods and styles to challenge students while teaching and seek alternative ways to help students learn. Teachers go that extra step in helping students succeed and provide a learning environment that is student centered while remembering to celebrate success along the way. Teachers love their job and reflect that in their attitude and love of learning. Parents are actively involved in their child's education. They talk daily to their child about school, assist them with their studies, attend conferences and parent meetings, and feel welcome at our school. The community is an active partner in the school and they vie to participate by donating time, talent, and treasures because they believe it is everyone's responsibility to educate our youth. Each grade level works closely with the community to provide real world experiences for the students. The students have an understanding of possible career paths for later in life.

In this environment where all adults are living by their core convictions, all students:

Are excited about coming to school and have high self-expectations. They are active learners, diligent, and motivated in getting the best grades. Students are provided many opportunities to work independently and participate in a group setting. Students want a challenging curriculum and are always looking for ways to improve by being goal oriented. Students show strong management skills by arriving to school on time, having perfect attendance, and turning in all assignments on time. They show great respect for and are truthful with their teachers and peers. Students will reflect their compassion and caring for one another on a daily basis. They are attentive in class and are not afraid of risk taking or asking questions to delve deeper into discussion. Students come to school ready to learn and to do their best while encouraging others to do the same. Students are involved in extra-curricular activities in addition to their regular school work.

As a result of these efforts, our school's student achievement data is as follows:

- % of students who pass ISTEP math: 100%
- % of students who pass ISTEP English: 100%
- % of students who are performing at grade level in all subjects: 100%
- % of students who are 8th graders receiving credit for Algebra 1: 100%
- % of students who move up at least one ENL level: 100%
- % of students who are on the A/B honor roll: 100%
- % of students who pass all classes: 100%
- % of students who read at grade level: 100%
- % of students who pass ISTEP science: 100%

- % of students who pass ISTEP social studies: 100%

Academic Goals

The academic goals were established after a thorough analysis of multiple achievement data assessments including the state math assessment, state English / language arts assessment, student mastery of each Indiana Academic Standard, and report card grades. A full list of academic assessments is found in the "Force Field Excerpts" section of this plan. Other types of data are discussed in the Needs Assessment section of this plan.

The Full Faculty, Community Council (including parent representatives), and Student Body were involved in the analysis of the achievement data. The following questions were addressed during the data analysis.

- How does this data compare to our vision (ideal) data?
- What specific data fields disturb us?
- What specific data fields please us?
- Where do we observe achievement gaps?

Using a consensus based decision-making model, the Full Faculty and Community Council (including parents) first identified a small number of broad academic areas on which the school and community agreed to focus their energy next year. Then, the teachers and Community Council members "drilled down" the data within those areas and identified specific courses or academic standards that, if improved, would impact the broader academic areas. Both the broad academic areas and the specific academic areas are included as goals below. Data targets that the educators and community members felt most strongly about were then provided to the students for their input. Finally, the educators and community members agreed to numerical goals that the school would strive to reach by the end of next school year. These goals fall between the current student data and the vision (ideal) data.

When reading the data tables below, please note that the title of each table includes:

- The group of students targeted to meet the goal
- The benchmark that those students will reach

The numbers in the tables reflect baseline data for past years and the target data for future years. The "vision data" represents our ideal data. It is the mission of our school to work toward this ideal.

Needs Assessment / Areas of Concern

The Areas of Concern were established after a comprehensive needs assessment that included a survey of all educators, all students, parents and community members. Survey data for students and parents were disaggregated by ethnicity and economic level. The needs assessment also included a collection of data that reflected specific student needs (e.g. attendance rate), and a summary of discussion responses to inquiry questions about areas that might be interfering with learning in the school and community. The collection of data provided information about the school's expectations for student achievement, curriculum, instruction, classroom assessment, extra help, student guidance and the learning environment.

All educators and the Community Council (including parent representatives) were involved in the analysis of the student needs data. Specific attention was given to areas within the classroom that are interfering with learning. The following questions were addressed during the data analysis.

- What data indicate an area that is interfering with achievement in our targeted academic areas for improvement?
- What data indicate an area that is interfering with achievement for the student group we have targeted for improvement?

The student body was asked to respond to an open ended question, "What is interfering with learning at our school?"

Using a consensus based decision-making model, the Full Faculty and Community Council identified key areas that concerned them because they were interfering with students' ability to reach the established academic goals and more specifically, were interfering with the achievement of the targeted student group. The Full Faculty and Community Council agreed to address these "Areas of Concern" through targeted strategies next year.

The student needs assessment will be conducted again in the future to analyze the impact of the strategies included in this plan.

The Areas of Concern identified by our Full Faculty and Community Council (including parents) are listed below.

Local Areas of Concern

We are concerned that... Behavior of other students impacts the learning of others

52% percent of our students feel the behavior of others interferes with their learning. 50% of our community believe that our students do not feel safe a school.

We are concerned that... Lack of parent involvement impedes student success

Only 30% of the community feel that students talk to their parents regularly about their school work while parents report this at 93%. Students on the other hand are at 72% overall. Only 36% of the students report that their parents and teachers regularly communicate while 51% of the parents feel they do and 36% of the community feels this happens. Faculty, on the other hand, reported in at 75%.

We are concerned that... LEP students need additional support to be successful

There is a 13% drop between 6th and 8th grade as far as teachers pushing Hispanic students to do their best; only 64% of the 8th grade Hispanic students say they pay attention in class; 63% of the Hispanic students participate in classroom discussions; In response to turning in homework daily, 88% of the 6th grade, 79% of the 7th grade, and 56% of the 8th grade Hispanic students agreed they do this

We are concerned that... Student need extra time/help to learn hard material

29% of the students do not feel they get extra help at school when having difficulty learning hard material; 93% of the faculty state they provide extra help in the classroom for students who can learn hard material, but need extra and/or individualized help; 96% of faculty state they provide additional time for students who can learn hard material, but at a slower pace - only 40% fo the students feel this way and only 39% of the parents feel this way

We are concerned that... Students need additional time to learn reading comprehension skills.

Strategies

Strategies were established after identifying 1) Achievement Goals (see the Achievement Goals section), and 2) Areas of Concern (see the Needs Assessment - Areas of Concern section). Educators researched possible strategies for addressing each Area of Concern and then presented possible strategies to Full Faculty and Community Council for their consideration. The student body was provided with a list of Areas of Concern and asked to provide their input regarding strategies the school and community could employ to address the concerns. Using a consensus based decision-making model, the Full Faculty and Community Council (including parent representatives) agreed to several strategies to implement next year.

Strategy Data: Strategy data will help the Full Faculty and Community Council determine the degree to which the strategy has changed adult practices. Baseline data was collected this year. Follow-up data will be analyzed at the end of each semester next year. Combined with the needs assessment data (including student surveys) and the achievement data, our school will have a good understanding of the success of the strategies in meeting student needs. The strategy data tables can be found in the Strategy Data section of this plan.

Strategy To-Do Lists: Each strategy has been assigned a Strategy Chair. In some cases, the Strategy Chair asked others to form a Strategy Task Force. For almost all strategies, the Strategy Chair developed a detailed "To-Do" list that includes activities related to 1) implementation, 2) professional development, 3) anti-resistance (helping those impacted by the strategy to embrace the strategy), and 4) strategy evaluation. The strategy to-do lists can be found in the Strategy To-Do List section of this plan.

The strategy titles and descriptions are listed below:

Local Strategies

Credit Recovery Program

Students who receive a failing grade (59% or below) at the end of the grading period in any of the five core subjects (language arts, math, reading, science, and social studies), will be required to complete the credit recovery program. This program meets daily for 30 minutes and provides one-on-one instruction along with strategies to address factors which contribute to failure which include: failure of exams, lack of motivation, lack of homework, and lack of responsibility.

Impact Level: High Impact - Inside

Focus: General

Encourage Rigorous Curriculum: Essential Skills Class

School administrators will identify students with low ISTEP scores in the math and language arts area. These students will be placed in the Essential Skills Classroom (ESC) according to their need for remediation in either math or language arts. Remediation will be through a variety of methods taught by a certified teacher. Students will remain in ESC for the entire school year.

Impact Level: High Impact - Inside

Focus: Specific

Olweus Bullying Prevention Program

Staff development for the Olweus Bullying Prevention Program (OBPP) began in 2008 and will continue throughout the 2011-2012 school year. The OBPP is the most researched and best-known bullying prevention program available and its purpose to change the norms around bullying behavior and to restructure the school setting itself so that bullying is less likely to occur. The OBPP strategy team will continue training the staff in the proper use of the OBPP who will in turn train the students.

Impact Level: High Impact - Outside

Focus: General

Parent Involvement

Parents will have the opportunity throughout the school year to be better informed of their students' curriculum, success, and school policies at Lincoln Middle School. This will be accomplished through technology training, informational resources, transitional back-to-school with, parent-teacher interventions, and P.I.E. (Parents Involved in Education) meetings.

Impact Level: Low Impact

Focus: General

Positive Leveling System

Lincoln Middle School staff will implement the Positive Leveling System. The behavioral level system promotes consistent expectations for all students and is monitored and enforced by all staff. Teachers and staff record behavior data into a computer program during a 2 week period as the incidents occur. At the end of the 2 weeks, a level is assigned to each student based upon the value of the incidents recorded for them. The office personnel will be responsible for coordinating the level reports and stickers. Stickers showing a student's level will be distributed to the Focus teachers to be placed in the assignment books. A student can be a level 4, 3, 2, or 1 and will remain on that level for the next two weeks. The students will earn privileges based upon their level with level 1 being the least restrictive and level 4 being the most restrictive. Point totals are cleared every two weeks giving students a chance to move up or down the leveling system as their behavior dictates.

Required Strategies

F. Encourage Rigorous Curriculum: Honors Program

Teachers will continue to recommend students of high ability for the Honors program for Math, Language Arts, Science, and Social Studies classes for grades 6, 7, and 8. In addition to teacher recommendation, students are also selected for this program based upon their ISTEP results, cognitive test results, and parental permission. Students in Honors Math will receive instruction at least one grade level above their peers. 8th grade students will be enrolled in Algebra I and will take the ECA to obtain high school credit. Lessons will be modified through acceleration of content or enrichment of content. Staff members are encouraged to utilize techniques to take classes toward the Academic Honors Diploma. During Focus, teachers are encouraged to provide activities which expand the students' scope of thinking.

G. Attendance

Student absences must be verified by a parent/guardian by calling the Lincoln MS office no later than 8:30 a.m. Tele-parent will place an automatic phone call to parents/guardians by 9:30 notifying them of their child's absence. Home visits may also be made to verify an absence. A maximum of 10 absences per year and all absences are considered unexcused unless they fall under the legal definition of excused absence. After the 3rd and 7th unexcused absence, the parents will be contacted by letter. After the tenth unexcused absence, the case will be referred to the Family Opportunity Center. Parents of students with chronically excessive absenteeism may be referred to the Prosecutor's Office.

Impact Level: Low Impact

Focus: Specific

I. Focused Academic Area: Simple 6 Writing

All students will participate in writing activities based on a staggered schedule which is provided at the beginning of the school year. Teachers will provide anchor papers so students can see samples of acceptable writing assignments. Faculty submit writing scores to Mr. Canady who will track the number of 4, 5, and 6 (scored) papers. Staff participate in ongoing professional development in the Simple Six program to maintain/advance their level of expertise in the score of their students' written work.

Focus: Specific

U. Focused Student Group: ENL Sheltered Classes

LMS will be piloting a sheltered class for 8th grade students for Social Studies, Science, and Language Arts during the 2009-2010 school year. In these classes consisting of only ENL/Migrant students levels 1-3, students will be provided direct instruction by a certified teacher with the assistance of a bilingual aid. Materials chosen for this class are specifically for ENL students aligning with state standards for each content area. Upon the success of this program, sheltered classes will be provided for all grade levels.

Impact Level: High Impact - Inside

Focus: Specific

U. Focused Student Group: Inclusion

LMS special education teachers, along with the math, science, social studies, and language arts general education teachers, will continue the development of an inclusion program and team teaching for the LD and MI students. Special education teachers and general education teachers will be team teaching math, science, social studies, and language arts classes to assist the special education students in gaining skills and mastery of standards at grade level.

Impact Level: High Impact - Inside

Focus: Specific

U. Focused Student Group: Special Education Resource Room

Provide a resource room for those special education students who are having difficulty with classroom assignments or are in need of remediation in math/language arts. Special education teachers will be assigned to the resource room at least three periods a day for to be of assistance to the students in Language Arts, Math, and Reading.

X. Graduation Plan

Students in the 6th grade, with input from their parents, will participate in developing an initial graduation plan. Included in this plan will be a statement of intent graduate from high school as well as acknowledgment of the need for good study habits, citizenship, and school attendance. Students in the 7th grade will update their initial graduation plan and continue to investigate education opportunities beyond high school. All 8th grade students will complete the graduation plan folders after completion of an interest survey, intense instruction on different career opportunities and the different diploma options, as well as other career choice information. Learn More Indiana information and graduation plan folders will be distributed to Focus teachers by the school counselor. Focus teachers will ensure that all information is presented and graduation plan folders are completed and returned to the counselor no later than November 30th. Learn More Indiana materials will be used for all three grade levels.

Strategy Data

Strategy data will help the teachers and Community Council determine the degree to which the strategy has changed adult practices. Baseline data was collected this year. Follow-up data will be analyzed at the end of each semester next year. Combined with the needs assessment data (including student surveys) and the achievement data, our school will have a good understanding of the strategy's success in meeting student needs. The strategy data tables below indicate 1) the group of adults or students that are expected to change as a result of this strategy, 2) the desired practice(s), and 3) what the school will count to determine the degree to which the practice(s) changed.

To-Do List

After the strategies were selected for next year, each strategy was assigned to a Strategy Chair. In some cases, the Strategy Chair asked others to form a Strategy Task Force. For almost all strategies, the Strategy Chair developed a detailed "To-Do" list that includes activities related to 1) implementation, 2) professional development, 3) anti-resistance (helping those impacted by the strategy to embrace the strategy), and 4) strategy evaluation. At the beginning of next year, each strategy chair will go over their strategy's "To-Do" list with the entire faculty. Throughout the year, each strategy chair will check off each strategy activity as it is completed. At the end of the first semester, each strategy chair will present the percentage of completed activities to the Full Faculty and Community Council. If the strategy activities were not fully implemented, the chair will facilitate a discussion about changes that will occur during the second semester to ensure that all activities are completed.

Report by strategy. Showing completed and yet-to-be-completed action steps.

Professional Development Summary

REPORT IS NOT FINAL - NOT ALL STRATEGIES HAVE MET CRITERIA

Alignment with the School Improvement Plan: The Professional Development Plan is directly aligned with strategies found in the School Improvement Plan. Professional development activities enhance educator's knowledge within one or more of the following areas: a) expectations, b) curriculum content, c) classroom instruction, d) classroom assessment, e) extra help, f) guidance, and g) the learning environment. The amount of funding allocated for each professional development activity and the funding source is listed for each professional development activity.

Effective Learning Process: The Professional Development Plan was written by teacher-leaders and includes activities that will help teachers develop the knowledge and skills needed to successfully implement the strategies listed in the School Improvement Plan. The plan includes a variety of formats for professional development. Activities have been embedded in the school day as appropriate. The plan also includes activities designed to provide teachers with feedback over time. Finally, "strategy data" is collected for comprehensive strategies that identifies the degree to which the strategy has brought about a positive changes in adult practices.

Professional Growth Environment: Each strategy is supported by a "strategy chair." Strategy chairs are responsible for 1) writing (with support from colleagues) a strategy plan including on-going professional development activities, anti-resistance, and evaluation activities, 2) providing on-going mentoring to their colleagues in the implementation of the strategy, 3) analyzing the effectiveness of the strategy, and 4) making a recommendation to the faculty with respect to whether or not the strategy should be sustained.
