School Improvement Plan Introduction

William W Borden Elem Sch

This school improvement plan was developed using a vision-based and data-driven process called *Vision-to-Action* that was developed by the Indiana Student Achievement Institute. In addition to containing the strategies our school and community identified as key to raising student achievement and closing achievement gaps in our school, this plan contains strategies that meet the expectations of:

- Indiana Student Achievement Institute
- Indiana Rules and Regulations
- Title I - Targeted Assistance School

Participation

The following people were involved in developing this School Improvement Plan

- Teachers
- Students
- Parent representatives
- Community representatives

Process

Those involved in developing this School Improvement Plan participated in a series of discussions related to the *Vision-to-Action* steps:

1. Establish a local culture of high expectations
2. Create a common vision for student success
3. Analyze achievement data and set realistic data targets for each of the next three years
4. Analyze force field data and identify concerns within the following areas.
 - Academic expectations
 - Curriculum content
 - Instructional practices
 - Classroom assessment
 - Extra help
 - Student guidance
 - Learning environment
5. Research strategies to address our concerns and select high-leverage strategies to implement
6. Develop a to-do list for each strategy

Using Data for Decision-Marking

The Vision-to-Action process relies heavily on data as a foundation for decision-making.

1. Achievement Data – To what degree are students prepared for success at the next educational level, and ultimately for success in postsecondary education and a global economy?
2. Force Field Data – What conditions in the school and community interfere with high student achievement?
3. Strategy Data – Is the strategy having the desired impact on adults and students?

Implementation Next Year

Our work next year will be guided by the to-do list that we have developed for each strategy.

Questions about the School Improvement Plan should be directed to the building principal.

Who Wrote this School Improvement Plan?

Many individuals were involved in the creation of this school improvement plan.

Groups and Roles

The **Steering Team** is comprised of educators, a parent, and a business representative. The Steering Team's role is to help the Full Faculty and Community Council 1) analyze data, 2) discuss key questions related to school improvement planning in an open and honest manner, and 3) reach consensus in decisions related to school improvement.

The **Full Faculty** is made up of all educators. The role of the Full Faculty is to 1) analyze data, 2) discuss key questions related to school improvement planning in an open and honest manner, and 3) reach consensus with each other and the Community Council for decisions related to school improvement.

The **Community Council** is comprised of parents and representatives of community stakeholder groups. All parents were invited to be part of the Community Council and any interested parent was welcome to join the Council. The role of the Community Council is to 1) analyze data, 2) discuss key questions related to school improvement planning in an open and honest manner, and 3) reach consensus with each other and the Full Faculty in decisions related to school improvement.

The **Student Body** includes every student enrolled in the school. The role of the Student Body is to 1) review data, 2) discuss key questions related to school improvement planning in an open and honest manner, and 3) provide input for the Full Faculty and Community Council.

Discussion Topics

The Full Faculty, Community Council and Student Body participated in guided discussions about the following topics. Written summaries of all discussions were developed and are on file at the school.

- Discussion 1: Global Economics
- Discussion 2: Vision for Student Success
- Discussion 3: Achievement Data Analysis and Achievement Goals
- Discussion 4: Force Field Data Analysis (student needs) and Areas of Concern
- Discussion 5: Strategy Selection

Vision Statement

The Vision Statement was developed by all educators, all students, and members of the community and is reviewed and updated annually. The foundation of the statement identifies the core convictions upon which this school improvement plan is built and answers the question, "What do our students deserve in order to be successful learners, responsible citizens, and productive members of a global economy?" The second part of the vision statement describes ideal adults who are striving to provide students with the things they deserve in order to achieve at a rigorous level. The third part of the vision statement describes ideal students in a school and community where adults live by their convictions. The last part of the vision statement includes ideal data that represent the community's dreams. This lofty data serves as the focal point for the remainder of the school improvement plan and requires the school and community to work toward every student succeeding at a high level.

We believe all students deserve:

At Borden Elementary School, we believe that all students deserve to be treated with respect from students and adults, and practice being respectful of others. We believe that our students deserve to be challenged with high expectations by highly effective teachers. Our students also deserve to learn in a positive, nurturing, and safe environment with current technology and resources.

All adults in our community are living by these core convictions daily and as a result, show the following attitudes and actions:

As all adults in our school community live by these core convictions, students will experience compassion with understanding, humor, empathy, and acceptance of diversity. Our staff keeps apprised of the current trends and methodologies within our elementary domain. Our staff continues to be trained with current technology and has reliable access to this technology on a consistent basis, enabling students to become knowledgeable in technological areas for real world applications. Students are provided opportunities to have deficient skills addressed using a variety of teaching methods, which match the students' learning styles.

In this environment where all adults are living by their core convictions, all students:

In this environment where all adults are living by these core convictions, our students are respectful of and responsible to staff, peers, and our school facility. They are able to apply complete and consistent effort to all academic endeavors. Our students will have opportunities to be involved in extracurricular activities and become well-rounded, productive, positive citizens, and life-long learners.

As a result of these efforts, our school's student achievement data is as follows:

- % of students who grades 3-6 score above State standards on ISTEP.: 100%
- % of students who non-ISTEP grades pass selected achievement test.: 100%
- % of students who grades 1-6 perform at or above grade level.: 100%
- % of students who achieve the national core standards: 100%
- % of students who exceed the minimum benchmarks on Dibels, TRC, mCLASS, and Acuity: 100%

Academic Goals

The academic goals were established after a thorough analysis of multiple achievement data assessments including the state math assessment, state English / language arts assessment, student mastery of each Indiana Academic Standard, and report card grades. A full list of academic assessments is found in the "Force Field Excerpts" section of this plan. Other types of data are discussed in the Needs Assessment section of this plan.

The Full Faculty, Community Council (including parent representatives), and Student Body were involved in the analysis of the achievement data. The following questions were addressed during the data analysis.

- How does this data compare to our vision (ideal) data?
- What specific data fields disturb us?
- What specific data fields please us?
- Where do we observe achievement gaps?

Using a consensus based decision-making model, the Full Faculty and Community Council (including parents) first identified a small number of broad academic areas on which the school and community agreed to focus their energy next year. Then, the teachers and Community Council members "drilled down" the data within those areas and identified specific courses or academic standards that, if improved, would impact the broader academic areas. Both the broad academic areas and the specific academic areas are included as goals below. Data targets that the educators and community members felt most strongly about were then provided to the students for their input. Finally, the educators and community members agreed to numerical goals that the school would strive to reach by the end of next school year. These goals fall between the current student data and the vision (ideal) data.

When reading the data tables below, please note that the title of each table includes:

- The group of students targeted to meet the goal
- The benchmark that those students will reach

The numbers in the tables reflect baseline data for past years and the target data for future years. The "vision data" represents our ideal data. It is the mission of our school to work toward this ideal.

Needs Assessment / Areas of Concern

The Areas of Concern were established after a comprehensive needs assessment that included a survey of all educators, all students, parents and community members. Survey data for students and parents were disaggregated by ethnicity and economic level. The needs assessment also included a collection of data that reflected specific student needs (e.g. attendance rate), and a summary of discussion responses to inquiry questions about areas that might be interfering with learning in the school and community. The collection of data provided information about the school's expectations for student achievement, curriculum, instruction, classroom assessment, extra help, student guidance and the learning environment.

All educators and the Community Council (including parent representatives) were involved in the analysis of the student needs data. Specific attention was given to areas within the classroom that are interfering with learning. The following questions were addressed during the data analysis.

- What data indicate an area that is interfering with achievement in our targeted academic areas for improvement?
- What data indicate an area that is interfering with achievement for the student group we have targeted for improvement?

The student body was asked to respond to an open ended question, "What is interfering with learning at our school?"

Using a consensus based decision-making model, the Full Faculty and Community Council identified key areas that concerned them because they were interfering with students' ability to reach the established academic goals and more specifically, were interfering with the achievement of the targeted student group. The Full Faculty and Community Council agreed to address these "Areas of Concern" through targeted strategies next year.

The student needs assessment will be conducted again in the future to analyze the impact of the strategies included in this plan.

The Areas of Concern identified by our Full Faculty and Community Council (including parents) are listed below.

Local Areas of Concern

We are concerned that... Staff need to provide positive behavior supports

Through faculty and community discussions, we would like to expand our positive behavior supports to include not only teachers but bus drivers, cafeteria workers, custodial staff members, and instructional assistants.

We are concerned that... Students need Inspiration to Read

Through faculty and community discussions it was found that there is a need to get books in kids hands by increasing the circulation via the library.

Strategies

Strategies were established after identifying 1) Achievement Goals (see the Achievement Goals section), and 2) Areas of Concern (see the Needs Assessment - Areas of Concern section). Educators researched possible strategies for addressing each Area of Concern and then presented possible strategies to Full Faculty and Community Council for their consideration. The student body was provided with a list of Areas of Concern and asked to provide their input regarding strategies the school and community could employ to address the concerns. Using a consensus based decision-making model, the Full Faculty and Community Council (including parent representatives) agreed to several strategies to implement next year.

Strategy Data: Strategy data will help the Full Faculty and Community Council determine the degree to which the strategy has changed adult practices. Baseline data was collected this year. Follow-up data will be analyzed at the end of each semester next year. Combined with the needs assessment data (including student surveys) and the achievement data, our school will have a good understanding of the success of the strategies in meeting student needs. The strategy data tables can be found in the Strategy Data section of this plan.

Strategy To-Do Lists: Each strategy has been assigned a Strategy Chair. In some cases, the Strategy Chair asked others to form a Strategy Task Force. For almost all strategies, the Strategy Chair developed a detailed "To-Do" list that includes activities related to 1) implementation, 2) professional development, 3) anti-resistance (helping those impacted by the strategy to embrace the strategy), and 4) strategy evaluation. The strategy to-do lists can be found in the Strategy To-Do List section of this plan.

The strategy titles and descriptions are listed below:

Required Strategies

A. Parent Involvement: Math Carnival

Our 6th grade teachers will have 6th grade students work in pairs to prepare math booths that address K-5 math standards. The school invites all K-5 students, their parents, and the community to attend the Math Carnival. The 6th grade teachers and students showcase their booths (approximately 50 booths) one evening in November. K-5 parents, students, and community visit each booth and participate in the math activities offered. All the booths are based on the K-5 math standards and help parents and community understand the Indiana Academic Standards and Common Core State Standards.

Impact Level: High Impact - Outside

Focus: Specific

A. Parent Involvement: Spring Fling

Our 4-6 grade and special area teachers will have 4-6 grade students showcase projects, give presentations, display art creations, and perform a musical which address 4-6 language arts, social studies/science (depending on grade-level), and performing arts standards. The school invites all K-6 students, their parents, and the community to attend the BEST Night and Spring Performance. The 4-6 teachers and students showcase their projects (approximately 100 projects) one evening in April or May. K-6 parents, students, and community members visit classrooms and view projects, presentations, creations, and performances. All the student creations are based on the 4-6 language arts, social studies/science (depending on grade-level), or performing arts standards and help parents and community understand the Indiana Academic Standards and Common Core State Standards.

Impact Level: High Impact - Outside

Focus: Specific

B. Educator Training - Parent Involvement: Grade level meetings

The Principal and Instructional Coach will mentor teachers in interpreting the Acuity/Dibels/TRC/mCLASS data and partner with the classroom teachers in identifying the specific needs of the students. The teachers will be trained to disseminate and explain this data to parents so parents can better understand how to help students with targeted needs.

Impact Level: High Impact - Inside

Focus: General

C. Outreach to Preschool Parent Involvement Programs: Camp Kindergarten

Kindergarten teachers will plan an evening during the last month of the school year where the incoming kindergarten parents meet with the teachers and other school officials regarding their areas of responsibility. The parents will be given information about the curriculum, common core standards, and activities to do with their child during the summer. During the meeting time, the incoming kindergarten students will experience various activities that they will have in kindergarten the following year.

Impact Level: Low Impact

Focus: Specific

E. Parent Information Resource Center Website

Each month of the school year, either a grade-level team, librarian, nurse, instructional coach/title I staff, or principal will be responsible for contributing 3-5 academic enrichment and/or remediation website links for the newsletter. These links will cover a variety of subject areas and state standards and will serve as tools for parents to visit to help their child. This newsletter will be sent home and posted on the school webpage monthly. We will also provide a link in the newsletter each month for Indiana's Parent Information and Resource Center (PIRC) at www.fscip.org.

Impact Level: Low Impact

Focus: General

F. Encourage Rigorous Curriculum: Curriculum Framework & Collaboration

All teachers, through grade level and/or staff meetings, will collaborate on curriculum. Common Core and the Indiana State Standards including Reading/LA and Math will be discussed. Teachers will have release time up to 2 half days, over the course of the year, for curriculum collaboration with their grade level team. Each grade level will document their progress from the curriculum collaboration to to present at the following staff meeting.

Impact Level: High Impact - Inside

Focus: Specific

F. Encourage Rigorous Curriculum: Exceptional Learners: High Ability

High Ability Learners (HAL) will be placed in a cluster group. If a HAL cluster consists of more than 8 students, then two clusters may be formed. The teacher will differentiate the curriculum for the HALs by using various strategies, such as, but not limited to: curriculum compacting, tiered lessons, ability grouping, flexible grouping, acceleration, and independent study projects. The High Ability Coordinator will serve as a resource to the cluster teachers in gathering and organizing materials, implementing differentiation strategies, and will also be available on a weekly basis to collaborate in the classroom.

Impact Level: High Impact - Inside

Focus: Specific

F. Encourage Rigorous Curriculum: STAR (Systematic Techniques for Academic Relevance) Enrichment/Remediation

Grade Level teachers will work with the Instructional Coach and Principal following each ELA/math diagnostic assessment window to review student data and to organize students within a grade level into enrichment and remediation intervention groups for STAR time. Specific ELA/math skill areas will be identified for the staff to work with these respective groups during the next time period, making the instructional match for the students in the skills areas needed. STAR time is provided for students in grades K-6. STAR time occurs 30-45 minutes/4 days per week, during the regular school day as part of the identified intervention block for each grade level. Teachers will turn in lesson plans weekly and keep documentation of students served as well as skills addressed.

Impact Level: High Impact - Inside

Focus: Specific

G. Attendance

Each week every grade-level's attendance rate is compiled. Bi-weekly during morning assembly, the grade-level with the highest attendance rate is recognized by standing and receiving applause from the entire school. The percentages are posted on a board in the office area, which the students walk past each day as they enter school. The monthly percentage winners from each week are included in the monthly newsletter which goes home to parents on the first Friday of every month.

Impact Level: Low Impact

Focus: General

I. Focused Academic Area: Tier 1 Core Reading

Each classroom teacher's schedule will include a 90-minute block of uninterrupted time designated for Reading/Language Arts instruction. Teachers use the Houghton-Mifflin Reading series as the curriculum base during this R/LA block time, supplementing areas where it is deficient in addressing the State Standards.

Impact Level: High Impact - Inside

Focus: Specific

J. Instruction by Highly Qualified Teachers: Professional Development

Classroom teachers will participate in on-going professional development regarding best practices and research-based techniques (through team meetings, literature distribution and dialogue, collaboration, webinars, and/or workshops) to keep apprised of the current effective research and practices to be implemented in the classroom. All teachers currently in our building meet the qualifications of being Highly Qualified. Teachers will maintain the requirements necessary to be classified as

Highly Qualified. All personnel to be hired will have already obtained the Highly Qualified status. The school will maintain a list of all teachers in the building that documents how each teacher has demonstrated subject matter knowledge (PRAXIS, NTS, HOUSSE, CAS). If there should ever be any teacher not classified as Highly Qualified in our building, a specific professional development plan would be implemented to assure that teacher obtains the necessary Highly Qualified status.

Impact Level: Low Impact

Focus: General

J2. Instruction by Highly Qualified Paraprofessionals.

The Special Needs teachers, in consultation with our Instructional Coach and Principal, will train the Instructional Assistants (Paraprofessionals) in different Language Arts and Math strategies to be able to reinforce skills for the at risk students effectively. The Special Needs Teachers will serve as models for the Instructional Assistants and provide support. The Special Needs Teachers, Instructional Coach, and Principal will meet quarterly to discuss agenda topics and plan for future meetings. The Instructional Coach will be available throughout the school year to assist the Special Needs Teachers and Instructional Assistants with Best Practices information/instruction. The school office will maintain a list of Para-Professionals who are considered as highly qualified along with the category that they met the highly qualified level. Also, as vacancies occur, only persons who already meet the highly qualified requirements will be hired.

Impact Level: Low Impact

Focus: General

L. Student Transition: Head Start Outreach

To assist parents and students transitioning from pre-school to kindergarten, the parents and incoming kindergarten students will be invited and encouraged to attend Camp Kindergarten in May to learn more about the school and procedures to make a smoother transition to school. Head Start will be contacted each year to check on the amount of Borden students being serviced so that these students can be invited to Camp Kindergarten.

Impact Level: High Impact - Outside

Focus: Specific

R1. Parent Right-to-Know Letter - Qualifications

The Superintendent and/or Principal will send every student's parent a letter during the first part of the school year letter to inform the parents that they have the right to request and receive information in a timely manner regarding the professional qualifications of their student's classroom teachers including all components described on DOE's Parent Right-to-Know Checklist.

Impact Level: Low Impact

Focus: General

R2. Parent Right-to-Know Letter - Non-Qualified Teacher

The Superintendent and/or Principal will notify parents if their child will have a non-Highly Qualified teacher assigned to instruct their child for four or more consecutive weeks during the school year. This notification will be sent to them within one week of knowing if this situation will be occurring.

Impact Level: Low Impact

Focus: General

S. School-Parent Compact

The Community Council, Teachers, and Students will review the current Parent-Teacher-Student School Compact and revise if necessary, which includes all the aspects described on the DOE site pertaining to the School Compact. The Parent-Teacher-Student School Compact will be presented and disseminated to the parents during the annual meeting by the building principal. If parents are not able to attend their respective annual meeting, it will be disseminated to them at Parent-Teacher conferences by the classroom teacher.

Impact Level: Low Impact

Focus: General

T. Annual Parent Meeting

Grade level teachers, grades K-6, will offer a grade level meeting for all parents during our fall open house which will occur within the first month of school to explain expectations, curriculum, rules and procedures. The principal and Instructional Coach will address the Title 1 areas needing to be covered. All parents will be encouraged to attend to meet their child's teacher, learn more about Title 1, and to develop a partnership between home and school. For Title 1 parents who cannot attend any of these meetings, another meeting, offered at a more flexible time of day will be offered to parents for the principal and/or Instructional Coach to review all the Title 1 components and to answer their questions. Documentation will be kept for possible Title 1 audit.

Impact Level: Low Impact

Focus: General

U. Focused Student Group: Special Education

The Special Needs Teachers, Special Needs Instructional Assistants, and/or the CIS Coordinator will work with special needs students daily using various educational software and materials aligned with the Indiana State Standards. The extra help sessions will be part of our S.T.A.R. (Systematic Techniques for Academic Relevancy) enrichment and remediation block of time to work on different skills needed.

Impact Level: High Impact - Inside

Focus: Specific

W. Timely Additional Assistance: Earobics

Students in grades 1-2 who are below proficiency in reading (red or yellow on Dibels) and need assistance with their reading skills will participate in a research-based intervention program called Earobics. This phonics based program will be held 4-5 days per week daily from August through mid-April, except during Acuity and ISTEP+ testing times, and will be taught by a Title One Teacher or a Special Education Teacher. This Tier 2 intervention is in addition to the Tier 2 small group assistance provided by the classroom teacher.

Impact Level: High Impact - Inside

Focus: Specific

W. Timely Additional Assistance: Levelled Literacy Interventions

Students in grades K-2 who are below proficiency (red and possibly yellow on TRC/Dibels) and need assistance with their reading skills will participate in a research-based intervention program called Levelled Literacy Intervention (LLI). This program will be held 4-5 days per week from August through mid-April, except during Acuity and ISTEP+ testing times, and will be taught by our Title I Teacher. This Tier 2 intervention is in addition to the Tier 2 small group assistance provided by the classroom teacher.

Impact Level: High Impact - Inside

Focus: Specific

W. Timely Additional Assistance: Read 180

Students in grades 3-6 who have a lexile score of 200 or greater but still need assistance with their reading skills will participate in a research-based intervention program called Read 180. This program will be held daily from August through mid-April, except during Acuity and ISTEP+ testing times, and will be taught by our Instructional Coach or a Special Education teacher. This Tier 2 intervention is in addition to the Tier 2 small group assistance provided by the classroom teacher.

Impact Level: High Impact - Inside

Focus: Specific

W. Timely Additional Assistance: Systems 44

Students in grades 3-6 who have a lexile score under 200 and need assistance with their reading skills may participate in a research-based intervention program called Systems 44. This program will be held daily from August through mid-April, except during Acuity and ISTEP+ testing times, and will be taught by our Instructional Coach or a Special Education teacher. This Tier 2 intervention is in addition to the Tier 2 small group assistance provided by the classroom teacher.

X. Graduation Plan: 6th Grade

All students entering 6th grade will create an Indiana Graduation Plan. During 6th grade parent/student orientation meeting in August, the Home School Liaison and Principal will provide students and parents information regarding the various diploma types. Students and parents will receive information on the school district's policy for attendance, as well as the importance of attendance, good citizenship, good study habits, and overall seriousness of their academic studies to prepare them to graduate. Parents and students will sign off on diploma track and promise to support/follow written plan. A copy of this will be placed in student's permanent file and follow the student to the Jr. high level.

Strategy Data

Strategy data will help the teachers and Community Council determine the degree to which the strategy has changed adult practices. Baseline data was collected this year. Follow-up data will be analyzed at the end of each semester next year. Combined with the needs assessment data (including student surveys) and the achievement data, our school will have a good understanding of the strategy's success in meeting student needs. The strategy data tables below indicate 1) the group of adults or students that are expected to change as a result of this strategy, 2) the desired practice(s), and 3) what the school will count to determine the degree to which the practice(s) changed.

To-Do List

After the strategies were selected for next year, each strategy was assigned to a Strategy Chair. In some cases, the Strategy Chair asked others to form a Strategy Task Force. For almost all strategies, the Strategy Chair developed a detailed "To-Do" list that includes activities related to 1) implementation, 2) professional development, 3) anti-resistance (helping those impacted by the strategy to embrace the strategy), and 4) strategy evaluation. At the beginning of next year, each strategy chair will go over their strategy's "To-Do" list with the entire faculty. Throughout the year, each strategy chair will check off each strategy activity as it is completed. At the end of the first semester, each strategy chair will present the percentage of completed activities to the Full Faculty and Community Council. If the strategy activities were not fully implemented, the chair will facilitate a discussion about changes that will occur during the second semester to ensure that all activities are completed.

Professional Development Summary

Alignment with the School Improvement Plan: The Professional Development Plan is directly aligned with strategies found in the School Improvement Plan. Professional development activities enhance educator's knowledge within one or more of the following areas: a) expectations, b) curriculum content, c) classroom instruction, d) classroom assessment, e) extra help, f) guidance, and g) the learning environment. The amount of funding allocated for each professional development activity and the funding source is listed for each professional development activity.

Effective Learning Process: The Professional Development Plan was written by teacher-leaders and includes activities that will help teachers develop the knowledge and skills needed to successfully implement the strategies listed in the School Improvement Plan. The plan includes a variety of formats for professional development. Activities have been embedded in the school day as appropriate. The plan also includes activities designed to provide teachers with feedback over time. Finally, "strategy data" is collected for comprehensive strategies that identifies the degree to which the strategy has brought about a positive changes in adult practices.

Professional Growth Environment: Each strategy is supported by a "strategy chair." Strategy chairs are responsible for 1) writing (with support from colleagues) a strategy plan including on-going professional development activities, anti-resistance, and evaluation activities, 2) providing on-going mentoring to their colleagues in the implementation of the strategy, 3) analyzing the effectiveness of the strategy, and 4) making a recommendation to the faculty with respect to whether or not the strategy should be sustained.
