School Improvement Plan Introduction

Pettit Park School

This school improvement plan was developed using a vision-based and data-driven process called *Vision-to-Action* that was developed by the American Student Achievement Institute. In addition to containing the strategies our school and community identified as key to raising student achievement and closing achievement gaps in our school, this plan contains strategies that meet the expectations of:

- American Student Achievement Institute
- Indiana Rules and Regulations
- Title I - Schoolwide
- Priority

Participation

The following people were involved in developing this School Improvement Plan

- Teachers
- Students
- Parent representatives
- Community representatives

Process

Those involved in developing this School Improvement Plan participated in a series of discussions related to the *Vision-to-Action* steps:

1. Establish a local culture of high expectations
2. Create a common vision for student success
3. Analyze achievement data and set realistic data targets for each of the next three years
4. Analyze force field data and identify concerns within the following areas.
 - Academic expectations
 - Curriculum content
 - Instructional practices
 - Classroom assessment
 - Extra help
 - Student guidance
 - Learning environment
5. Research strategies to address our concerns and select high-leverage strategies to implement
6. Develop a to-do list for each strategy

Using Data for Decision-Making

The Vision-to-Action process relies heavily on data as a foundation for decision-making.

1. Achievement Data – To what degree are students prepared for success at the next educational level, and ultimately for success in postsecondary education and a global economy?
2. Force Field Data – What conditions in the school and community interfere with high student achievement?
3. Strategy Data – Is the strategy having the desired impact on adults and students?

Implementation Next Year

Our work next year will be guided by the to-do list that we have developed for each strategy.

Questions about the School Improvement Plan should be directed to the building principal.

Who Wrote this School Improvement Plan?

Many individuals were involved in the creation of this school improvement plan.

Groups and Roles

The **Steering Team** is comprised of educators, a parent, and a business representative. The Steering Team's role is to help the Full Faculty and Community Council 1) analyze data, 2) discuss key questions related to school improvement planning in an open and honest manner, and 3) reach consensus in decisions related to school improvement.

The **Full Faculty** is made up of all educators. The role of the Full Faculty is to 1) analyze data, 2) discuss key questions related to school improvement planning in an open and honest manner, and 3) reach consensus with each other and the Community Council for decisions related to school improvement.

The **Community Council** is comprised of parents and representatives of community stakeholder groups. All parents were invited to be part of the Community Council and any interested parent was welcome to join the Council. The role of the Community Council is to 1) analyze data, 2) discuss key questions related to school improvement planning in an open and honest manner, and 3) reach consensus with each other and the Full Faculty in decisions related to school improvement.

The **Student Body** includes every student enrolled in the school. The role of the Student Body is to 1) review data, 2) discuss key questions related to school improvement planning in an open and honest manner, and 3) provide input for the Full Faculty and Community Council.

Discussion Topics

The Full Faculty, Community Council and Student Body participated in guided discussions about the following topics. Written summaries of all discussions were developed and are on file at the school.

- Discussion 1: Global Economics
- Discussion 2: Vision for Student Success
- Discussion 3: Achievement Data Analysis and Achievement Goals
- Discussion 4: Force Field Data Analysis (student needs) and Areas of Concern
- Discussion 5: Strategy Selection

Vision Statement

The Vision Statement was developed by all educators, all students, and members of the community and is reviewed and updated annually. The foundation of the statement identifies the core convictions upon which this school improvement plan is built and answers the question, "What do our students deserve in order to be successful learners, responsible citizens, and productive members of a global economy?" The second part of the vision statement describes ideal adults who are striving to provide students with the things they deserve in order to achieve at a rigorous level. The third part of the vision statement describes ideal students in a school and community where adults live by their convictions. The last part of the vision statement includes ideal data that represent the community's dreams. This lofty data serves as the focal point for the remainder of the school improvement plan and requires the school and community to work toward every student succeeding at a high level.

We believe all students deserve:

All students deserve to be a part of a school where they are accepted, valued, and respected for who they are. All students deserve to be engaged and challenged through a culture of high expectations and rigorous curriculum that is differentiated to meet their individual needs. Students deserve a clear and consistent environment that promotes lifelong learning and the life principles of: be kind, be clean, be safe, work hard, and fix your mistakes.

All adults in our community are living by these core convictions daily and as a result, show the following attitudes and actions:

All adults will work to make students feel accepted and valued. They will treat students with respect and model a caring and positive attitude. Adults will build healthy relationships with students and serve as positive role models in their lives. All adults will engage and challenge students with high expectations and rigorous curriculum that is differentiated to meet the needs of all students. All adults have clear expectations for students and follow the school principles and procedures.

In this environment where all adults are living by their core convictions, all students:

Students value themselves by making responsible decisions and taking an active part in their education. They will arrive to school on time each day prepared to learn. Students will engage in healthy relationships with staff and other students. Students will know when and how to ask for help, they will support each other, and show good teamwork skills. Students will actively participate in classroom instruction and work hard to be successful. Students will have knowledge of their own strengths and weakness in order to set goals for themselves. Students will display a positive attitude toward school, adults, and other students. Students will know the expectations expected of them and follow our school principles.

As a result of these efforts, our school's student achievement data is as follows:

- % of students who pass ELA ISTEP+ or IMAST: 100%
- % of students who pass MATH ISTEP+ or IMAST: 100%
- % of students who read on or above grade level: 100%

Academic Goals

The academic goals were established after a thorough analysis of multiple achievement data assessments including the state math assessment, state English / language arts assessment, student mastery of each Indiana Academic Standard, and report card grades. A full list of academic assessments is found in the Force Field Excerpts section of this plan. Other types of data are discussed in the Needs Assessment section of this plan.

The Full Faculty, Community Council (including parent representatives), and Student Body were involved in the analysis of the achievement data. The following questions were addressed during the data analysis.

- How does this data compare to our vision (ideal) data?
- What specific data fields disturb us?
- What specific data fields please us?
- Where do we observe achievement gaps?

Using a consensus based decision-making model, the Full Faculty and Community Council (including parents) first identified a small number of broad academic areas on which the school and community agreed to focus their energy next year. Then, the teachers and Community Council members "drilled down" the data within those areas and identified specific courses or academic standards that, if improved, would impact the broader academic areas. Both the broad academic areas and the specific academic areas are included as goals below. Data targets that the educators and community members felt most strongly about were then provided to the students for their input. Finally, the educators and community members agreed to numerical goals that the school would strive to reach by the end of next school year. These goals fall between the current student data and the vision (ideal) data.

When reading the data tables below, please note that the title of each table includes:

- The group of students targeted to meet the goal
- The benchmark that those students will reach

The numbers in the tables reflect baseline data for past years and the target data for future years. The "vision data" represents our ideal data. It is the mission of our school to work toward this ideal.

Comprehensive Needs Assessment / Areas of Concern

The Areas of Concern were established after a comprehensive needs assessment that included a survey of all educators, all students, parents and community members. Survey data for students and parents were disaggregated by ethnicity and economic level. The needs assessment also included a collection of data that reflected specific student needs (e.g. attendance rate), and a summary of discussion responses to inquiry questions about areas that might be interfering with learning in the school and community. The collection of data provided information about the school's expectations for student achievement, curriculum, instruction, classroom assessment, extra help, student guidance and the learning environment.

All educators and the Community Council (including parent representatives) were involved in the analysis of the student needs data. Specific attention was given to areas within the classroom that are interfering with learning. The following questions were addressed during the data analysis.

- What data indicate an area that is interfering with achievement in our targeted academic areas for improvement?
- What data indicate an area that is interfering with achievement for the student group we have targeted for improvement?

The student body was asked to respond to an open ended question, "What is interfering with learning at our school?"

Using a consensus based decision-making model, the Full Faculty and Community Council identified key areas that concerned them because they were interfering with students' ability to reach the established academic goals and more specifically, were interfering with the achievement of the targeted student group. The Full Faculty and Community Council agreed to address these Areas of Concern through targeted strategies next year.

The student needs assessment will be conducted again in the future to analyze the impact of the strategies included in this plan.

The Areas of Concern identified by our Full Faculty and Community Council (including parents) are listed below.

Areas of Concern

We are concerned that... Not enough positive feedback is given to student along with not enough positive talk heard among teachers

Walk thrus Surveys

We are concerned that... Teachers do not have high expectations

Only 49% of 3rd grade students passed IREAD 2012-2013

We are concerned that... Support people (co-teachers/para) are pulled from daily classroom assignments for other duties

Teacher surveys Walk-thrus

We are concerned that... All strategies are not being implemented with fidelity throughout the school

Student and teacher surveys and data show discrepancies between what is being expected and what is actually being implemented. Teacher surveys and discussions don't always match what is seen around the building.

We are concerned that... Annual Parent Meeting

Title 1 required

We are concerned that... Attracting Highly Qualified Teachers

Title One requirement

We are concerned that... Co-teaching situations vary from room to room and continues to need to be a focus

Teacher surveys and building walk-thrus show that co-teachers are being used in a variety of ways. Teacher mention needing more training to make the model more effective for students.

We are concerned that... Educator Training - Parent Involvement

Title 1 required

We are concerned that... Instruction by Highly Qualified Paraprofessionals

We are concerned that... Instruction by Highly Qualified Teachers

Title One requirement

We are concerned that... Outreach to Preschool Parent Involvement Programs

title 1 required

We are concerned that... Parent Information Resource Center Website

Title One requirement

We are concerned that... Parent Involvement

Title 1 required- Survey shows that we are not reaching all parents. A limited amount of parents are involved on a consistent basis.

We are concerned that... Parent Notice - Assessment Results

Title 1 required

We are concerned that... Parent Right-to-Know Letter - Non-Qualified Teacher

Title One requirement

We are concerned that... Parent Right-to-Know Letter - Qualifications

title 1 required

We are concerned that... School-Parent Compact

Title 1 rerquired

We are concerned that... School-Parent Involvement Policy

Title One requirement

We are concerned that... Staff behaviors do not always support positive student behaviors--more teaching, modeling, and recognition is needed.

Force Field data shows all students are not feeling safe at school, many students do not speak up in class to ask questions, and some student report their teachers are unhappy. Walk-thrus around the building show classrooms have a varying amount of community built up between staff and students. Behavior referrals to the office often cite disrespect, talking back, refusing to follow instructions, and defiance as the cause of the write-up. Data from this years (2012-13) PBIS show that referrals are going down and staff climate survey shows our school climate is moving up.

We are concerned that... Student Transition

Title One requirements

We are concerned that... Teachers do not have a scope and sequence plan to follow to help guide their language arts instruction.

There has been awareness throughout the district about our lack of curriculum for teachers to follow. This year teachers did start to use some of the curriculum maps provided by the DOE but work has now begun on writing our own district maps. Teachers will continue to think in terms of planning units based around standards to be taught which include differentiation.

We are concerned that... Teachers implenting 1:1 technology in their classrooms next year.

Beginning 2012-13 our school became fully implemented 1:1 technology in the classrooms. All teachers are utilizing technology on a daily bases. Walk throughs show this hasn't fully impacted our instruction. We will receive professional development for technology instruction.

We are concerned that... Teachers need support with differentiating their instruction.

Teachers are voicing struggles in knowing how to differentiate instruction to meet the needs of all students in their classrooms. District training is being done around differentiating and unit planning. This will continue next year.

We are concerned that... Teachers use data to guide instruction in their classrooms.

Through surveys and discussion, we recognize that while we are constantly assessing, teachers don't always alter their instruction to match the results of the assessment.

We are concerned that... Timely Additional Assistance

Title One requirement

We are concerned that... Encourage Rigorous Curriculum

We are concerned that... Attendance

We are concerned that... Focused Academic Area

We are concerned that... Focused Student Group

We are concerned that... teachers are not reflecting on what is working in order to make changes

Teacher collaboration Surveys

Strategies

Strategies were established after identifying 1) Achievement Goals (see the Achievement Goals section), and 2) Areas of Concern (see the Needs Assessment - Areas of Concern section). Educators researched possible strategies for addressing each Area of Concern and then presented possible strategies to Full Faculty and Community Council for their consideration. The student body was provided with a list of Areas of Concern and asked to provide their input regarding strategies the school and community could employ to address the concerns. Using a consensus based decision-making model, the Full Faculty and Community Council (including parent representatives) agreed to several strategies to implement next year.

Strategy Data: Strategy data will help the Full Faculty and Community Council determine the degree to which the strategy has changed adult practices. Baseline data was collected this year. Follow-up data will be analyzed at the end of each semester next year. Combined with the needs assessment data (including student surveys) and the achievement data, our school will have a good understanding of the success of the strategies in meeting student needs. The strategy data tables can be found in the Strategy Data section of this plan.

Strategy To-Do Lists: Each strategy has been assigned a Strategy Chair. In some cases, the Strategy Chair asked others to form a Strategy Task Force. For almost all strategies, the Strategy Chair developed a detailed "To-Do" list that includes activities related to 1) implementation, 2) professional development, 3) anti-resistance (helping those impacted by the strategy to embrace the strategy), and 4) strategy evaluation. The strategy to-do lists can be found in the Strategy To-Do List section of this plan.

The strategy titles and descriptions are listed below:

Strategies

Annual Parent Meeting

The annual parent meeting will be held at the beginning of each school year. This meeting will be held at two different times to ensure that all parents will be able to attend. One meeting is held during the day and the other is held in the evening. During the meeting, parents will be informed of the school's participation in Title I, Part A programs, and to explain the Title I, Part A requirements and the right of parents to be involved in those programs, ISTEP+ results, and given a time to voice their concerns, questions and/or comments. Parents are given copies of the Parent Involvement Policy, School-Parent Compact and the School Improvement Plan. Parent input is encouraged and discussed as revisions are made to these documents. Parents will be asked to complete a survey that assesses the effectiveness of the school's parent involvement programs. The results of the Annual Review will be discussed. Documentation including an agenda and a parent sign-in sheet will be kept on file at the school

Impact Level: Low Impact

Focus: General

Attendance

Teachers actively encourage perfect attendance and stress the importance of being at school. The school will reward students for perfect and great (less than 3 absences) attendance at award programs throughout the year. Teachers will report attendance daily in Power School. Students and parents will receive an attendance update with every midterm and 9 week report card. Continued unexcused absences will be referred to the School Attendance Monitor (social worker) for investigation. Our policy includes sending letters and holding meetings with parents and if need be further legal action.

Impact Level: Low Impact

Focus: General

Attracting Highly Qualified Teachers

To ensure that students are taught by highly qualified teachers, we will 1) review teacher qualifications annually; 2) assign only highly qualified teachers to low achieving students; and 3) encourage our highly qualified teachers to stay in our school by providing a supportive and caring environment and by providing professional development opportunities. The school website and newsletter will be used to promote community relations and provide information to attract high quality staff. Ongoing professional development during the school year and summer, including an intensive new teacher-training program, professional collaboration and planning time, and coaching by the Instructional Facilitator attracts high quality staff in a safe and secure learning environment. Experienced teachers will be recruited, assigned and retained to serve high needs students through an intensive selection process. The principal will review the qualifications of staff and work with the Instructional Facilitator to provide extensive training. The Kokomo Schools Human Resource Department, Title I Director and the school principal work together to interview and hire high quality teachers in schools with the greatest need. Interviews and informational programs are conducted throughout the state at universities and colleges with high quality education programs. An online application system provides easy access to high quality teachers throughout the country. During the hiring process, only high quality teachers are selected after extensive interviews, contacts with references, and reviews of academic records.

The Public Relations Department has developed a brochure to attract high quality staff. The KSC district website provides valuable information for recruiting high quality staff. Individual school websites promote community relations and provide information to attract high quality staff. School and district newsletters attract high quality staff. Extensive technology training and systems attract high quality staff.

Behavior Strategy-PBIS

Staff and students will implement a school-wide Positive Behavioral Interventions and Support (PBIS) system during the school year. This system will be based on our Pettit Park R.O.C.K.S. principles of Respect, On Time/On Task, Cooperative, Kind, and Safe. The PBIS system will include staff member training, student training, teaching and modeling appropriate student and staff behaviors, and implementing a system of positive rewards for appropriate behavior.

Focus: General

Educator Training - Parent Involvement

During our summer professional development as well as our beginning of the year meetings, staff will discuss and implement strategies from Todd Whitaker's 50 Ways to Improve Student Behavior. In the fall our social worker will work with teachers how to understand the value and utility of parental contributions, the importance of having parents involved in school activities, how to effectively communicate and work with parents as partners, how to encourage parents to become more involved in the school community and how to implement and coordinate parent programs that build ties between the parents and the schools.

Impact Level: High Impact - Outside

Focus: General

Encourage Rigorous Curriculum

Teachers will continued to work collaboratively to design unit plans of study for grades K-5. Teachers will implement the new Indiana Common core Standards and align units to include the new standards. Teachers will work to differentiate these units to meet the needs of all students. Teachers will meet in grade level and content area teams to determine what resources they will use that will help them best teach the content. Teachers will design pre and post tests to assess students on skills and units as well as use frequent informal ongoing assessments to guide instruction. Teachers will meet to discuss and analyze the data to determine progress and discuss strategies to assist those that are not showing progress and offer extension activities for those that need acceleration.

Impact Level: High Impact - Inside

Focus: Specific

Focused Academic Area-Reading

Teachers will implement daily Reading workshops in their classrooms for a minimum of 90 uninterrupted minutes. Teachers will include daily mini lessons focused on comprehension, thinking skills, and reading strategies. Mini lessons will be guided by district curriculum maps based on the Indiana Common Core English Language Areas Standards as well as the needs of students. Small group and/or individual differentiated instruction will be done daily as students also engage in extended independent reading time as well as literacy stations, buddy reading, reading with technology, and reading response. Students will be given adequate time to share their learning and progress with other students as well as their teachers. Teachers who are co-teaching during the 90 minute reading block or who have additional assistance during this time will work with each other to use the combined resources and manpower to best meet the needs of students. Teachers will be supported by the building coach through professional development, modeling, feedback, and collaboration.

Impact Level: High Impact - Inside

Focus: Specific

Focused Student Group

General education teachers and special education teachers will work together to differentiate instruction for students at risk of not meeting grade level standards during core academic instructional time. Teachers will use district assessments to identify students who are in need of interventions. The most at-risk students will receive additional 20-30 minutes per day of small group intensive literacy instruction that focuses on improving vocabulary, phonemic awareness, phonics, fluency and comprehension as well as writing skills. Progress will be monitored with work samples, informal reading assessments, and writing prompts; data will be analyzed and linked to modifications in instruction. Each student will set reading and goals for the school year and record his/her progress on data charts with the teacher. Our school will monitor three types of data to help us understand the degree to which this strategy is meeting student needs: 1) strategy data will help us determine the degree to which the adults changed their practices; 2) force field data will help us determine the degree to which student needs changed; and 3) achievement data will help us determine if the changes in adult practices and student needs had an impact on student

achievement. Based on our follow-up data which we will review at the end of each semester next school year, we will make adjustments to this strategy as appropriate.

Instruction by Highly Qualified Paraprofessionals.

Paraprofessionals are required by the Kokomo Schools Human Resource Department to meet the requirements of NCLB prior to hiring. The principal at the school verifies that each paraprofessional meets the requirements of NCLB by checking records in the HR department and by discussing qualifications with staff. These requirements include having a minimum of 48 credit hours of university credit, or an associate's degree from college, or successfully completing/passing the Parapro Test. When working with students, paraprofessionals are directly supervised by a licensed certified teacher. Throughout the school year, our building literacy coach will provide paraprofessionals with ongoing, job-embedded opportunities for professional development based on their roles working in classrooms and with students.

Focus: General

Instruction by Highly Qualified Teachers

To ensure that all of our students are taught by highly qualified teachers, we will 1) hire only highly qualified teachers; 2) help those who are not highly qualified develop and implement a personalized plan for becoming highly qualified, and 3) make sure that our low-achieving students are taught by highly qualified professionals. In addition, we will make parents aware of the school's progress in employing highly qualified teachers and professionals by communicating with them during meetings and parent conferences, and through newsletters, the school website and specific notification letters as needed. Staff is required by the Kokomo Schools Human Resource Department to meet the requirements of NCLB prior to hiring. The principal at the school verifies that each staff meets the requirements of NCLB by checking records in the HR department and by discussing qualifications with staff. The principal will maintain a list of all teachers in the building that indicates whether or not each teacher holds a valid Indiana teaching license and that each teacher has demonstrated subject matter knowledge (PRAXIS, NTS, HOUSSE, CAS). All teachers will be assigned to areas in which they are certified to teach. Currently, all teachers are highly qualified. If non-highly qualified teachers were to exist in the school, the instructional facilitator would provide professional development activities to assist the non-highly qualified teacher(s) in meeting the highly qualified teacher requirements.

Instruction by Highly Qualified Teachers-ongoing development

Ongoing support will be provided to staff to reduce teacher turnover and to improve teacher quality. Teachers, paraprofessionals and the principal will participate in monthly staff training sessions. The focus of the training will be the Schoolwide Reform Strategies in the Schoolwide Plan including reading, writing, and math workshops, differentiated instruction and unit planning, use of technology and 1:1 student computing, as well as general building instructional concerns and best practices. Staff will be trained to meet the individual needs of all students, particularly the lowest achieving students, through differentiated instruction methods. Ongoing and sustained professional development that is aligned with the school improvement goals will be provided weekly in the classrooms by the Instructional Coaches who will model, mentor, coach, team teach and observe strategies being implemented.

Instructional Focus - 1:1 Technology

Pettit Park is a 1:1 Technology school. Each student has their own personal computing device for use during the school day. This will be tablet devices for grades K-2 and laptops for grades 3-5. Teachers will work to daily incorporate technology as an instructional tool. Students' personal computing devices will be utilized for student learning, skills practice, assessment, communication, and projects. Teachers will take part in on-going professional development as well as the services of district and building level technology coaches to strengthen the use of technology in their classrooms.

Instructional Strategy: Co-Teaching

General education classrooms will be paired up special education teachers and specialists based on teacher and student needs. Teachers will collaborate and work together to plan instruction and assessment for the classroom in order to best meet the needs of all students. Time will be allotted for planning at an agreed upon time (i.e. specials block, before school prep time, after school, grade level meetings).

Outreach to Preschool Parent Involvement Programs

As a part of our parent literacy nights, information will be available for parents with children younger than kindergarten age. This may include information for parents about the knowledge and skills that children need in order to be prepared for kindergarten, and reading/math activities for parents to engage in with their preschooler at home. Information for preschool parents will also be displayed on our parent information wall.

Parent Information Resource Center Website

We will inform parents about the Indiana Parent Information and Resource Center (PIRC) at www.fscp.org. We will pass this information out at our back to school night, post it on our parent bulletin board, and link it on our website. The purpose of this website is to empower parents about their rights and responsibilities pertaining to their children's education by providing parent-focused workshops that are scheduled by schools, community groups, or parent groups, providing education-related information and resource materials, including information about the state (PL221) and federal (No Child Left Behind) accountability laws, and by helping schools develop parent engagement strategies that provide opportunities for parents to become decision-makers in their children's school, resources for school improvement, and mentors to others.

Parent Involvement - School Activities

Pettit Park will host a variety of activities throughout the school year designed to promote parent involvement and a connection between a student's home and school life. These activities will give families an opportunity to become involved in what is happening at school and give staff an opportunity to interact with families on a regular basis. These activities include Book Bingo and One Book One School events that help educate parents on the importance of reading and home literacy. There will be also be at least two technology nights in which students and staff highlight work being done with the 1:1 technology. Also included are a back to school/neighborhood bash, a fall open house and a parent conference day in which teachers will talk directly with parents about academic standards, expectations, and student progress.

Parent Involvement - Schoolwide Plan

Parents will be involved in the planning, review and improvement of the Schoolwide Plan during family/community/staff meetings to be held during the Fall and Spring semesters. During the Fall meeting, the current plan will be reviewed while during the Spring meeting, the plan will be revised and improved for the following school year. Parents will have an opportunity to review the plan prior to the Fall meeting. The current Schoolwide Plan will be posted on the school website and sent home. Surveys will be sent to parents to collect input about the plan from those that cannot attend the meetings. Moreover, parents will be asked to evaluate the effectiveness of the parent involvement activity by completing surveys at the end of the activity.

Parent Involvement - Workshops

Parent Workshop Nights will be held once each semester. The workshop nights will include whole group sessions as well as smaller break out sessions. Sessions will be designed to educate parents on parenting techniques, academic activities to use at home, school/community resources available, strategies used at school, and understanding a child's progress. During first and second semester, staff will hold a Reading Night for students and families in the evening. Staff will model how to enrich reading time with children at home. Parents will learn how to help their children at home with reading, including how to monitor their progress. Parents will have opportunities to discuss reading strategies with staff. Parents will be able to make items needed for this enrichment time to have at home. We will send home a follow up survey to determine effectiveness of the Reading Night as well as to find out what type of follow up assistance would be beneficial.

Parent Notice - Assessment Results

Individual reports of student performance on ISTEP+ will be sent to every parent in their native language along with a letter that describes and interprets the ISTEP+ results and encourages parents to contact school staff with questions and concerns. Parents will also be given information about how to access their children's test results online at the IDOE Parent Network website. Other individual assessment results from district benchmark assessments Fountas & Pinnel will be sent to parents along with an explanation of the assessment and suggestions for parents. Parents may contact the school to meet the teacher and/or principal to further discuss student performance on these assessments.

School-Parent Compact

The school has developed a school-parent compact that outlines how parents, the entire school staff, and students share the responsibility for improved student academic achievement and the means by which the school and parents will build and develop a partnership to help children achieve the State's high standards. The compact describes the school's responsibility to provide high-quality curriculum and instruction in a supportive and effective learning environment that enables the children served to meet the State's student academic achievement standards. The school-parent compact is revised and reviewed annually by staff and parents. The compact is shared with parents and students in the registration packet and during parent conferences. Moreover, it is mailed to all parents.

Schoolwide Reform Strategy: Instruction Accountability

Each teacher will follow grade level and district expectations for instruction on a daily basis. These expectations will be determined based on student needs, standards, balanced comprehensive literacy and math instruction, embedding of 1:1 technology, as well as teacher and administrator concerns. This will include daily, differentiated reading, writing, and math workshops in all classrooms. It will also include the embedded use of technology both in teacher and student work throughout the school day. Teachers will be held accountable through lesson plans, coaching sessions, walk-thrus, and evaluations.

Student Transition

Kindergarten teachers will provide a "Kindergarten Kamp" before the beginning of the school year. This time will be used to help students and parents feel more comfortable about the upcoming year, to explain expectations to parents, to discuss the Kindergarten curriculum and program, to meet the teachers, to visit the classroom, and to address questions or concerns that the parents may have. The corporation will be holding a district wide kindergarten roundup in the spring. The corporation will send out flyers and do a radio advertisement for kindergarten roundup to ensure that we are reaching all possible new students and ensure making the transition into kindergarten easier. Kindergarten teachers will contact Head Start, other local preschools, and the families of the preschool at Pettit Park to invite them to a collaborative informational meeting prior to the start of school to discuss the Kindergarten curriculum and program. We will work with staff at Head Start during the school year to coordinate and align instruction for children transitioning from preschool to kindergarten. To better prepare preschool students for the kindergarten curriculum, preschool teachers and families will be given copies of the curriculum, including grade level standards, skills and expectations needed by preschool students to be ready for Kindergarten.

Teachers Included in Assessment Decisions

During the fall and spring Community Council meetings for school improvement planning, teams of teachers, administrators and parents will review school based assessments and data. In addition, teachers will be expected to participate in grade level team meetings to review and analyze assessment data, to make decisions based upon results that will improve student achievement, and to link results to instructional strategies and methods. Assessments will include district-wide assessments as well as school and classroom on-going assessments. Teachers will work together to develop pre and post assessments to align with units being taught in order to differentiate instruction for student needs. Data from school assessments (Fountas & Pinnell) will be recorded and graphed on class analysis charts and kept in teacher data folders as well as on school data wall. Assessment data will be standards-based and include ISTEP+, Acuity, Fountas & Pinnell, and Writing Prompts. Student progress toward mastering grade level standards will be monitored and reported to parents.

Timely Additional Assistance - Small Group Instruction

Grade level teacher teams, along with resource teachers and paraprofessionals, will work together to provide small group instruction to students (in addition to regular classroom instruction) 3-4 times a week during a set time. Instruction will be focused on a specific skill, strategy, or standard. Students will either receive remediation work, at grade level work, or extension work for the targeted topic. All students will be assessed to determine levels of proficiency (ISTEP+, Acuity, Fountas & Pinnell). The teachers will identify students that are at least a year below grade level in reading. Students that have not mastered grade level standards will receive an additional 20-30 minutes per day of small group targeted intervention instruction by support staff that focuses on individual needs for improving vocabulary, phonemic awareness, phonics, comprehension and fluency as well as writing skills/strategies. Lessons will be differentiated by support staff based upon skill level, learning style and grade level. We will provide thematic, integrated instruction, designed to accommodate the needs of various learning styles. Progress will be monitored with work samples and informal reading assessments; data will be analyzed and linked to modifications in instruction. Each student will set reading goals for the school year and record his/her progress on data charts. The timely additional assistance will be coordinated with the Response to Instruction process for identifying, serving, and monitoring students that require Tier 2 and 3 interventions.

Strategy Data

Strategy data will help the teachers and Community Council determine the degree to which the strategy has changed adult practices. Baseline data was collected this year. Follow-up data will be analyzed at the end of each semester next year. Combined with the needs assessment data (including student surveys) and the achievement data, our school will have a good understanding of the strategy's success in meeting student needs. The strategy data tables below indicate 1) the group of adults or students that are expected to change as a result of this strategy, 2) the desired practice(s), and 3) what the school will count to determine the degree to which the practice(s) changed.

To-Do List

After the strategies were selected for next year, each strategy was assigned to a Strategy Chair. In some cases, the Strategy Chair asked others to form a Strategy Task Force. For almost all strategies, the Strategy Chair developed a detailed "To-Do" list that includes activities related to 1) implementation, 2) professional development, 3) anti-resistance (helping those impacted by the strategy to embrace the strategy), and 4) strategy evaluation. At the beginning of next year, each strategy chair will go over their strategy's "To-Do" list with the entire faculty. Throughout the year, each strategy chair will check off each strategy activity as it is completed. At the end of the first semester, each strategy chair will present the percentage of completed activities to the Full Faculty and Community Council. If the strategy activities were not fully implemented, the chair will facilitate a discussion about changes that will occur during the second semester to ensure that all activities are completed.

Professional Development Summary

Alignment with the School Improvement Plan: The Professional Development Summary is directly aligned with strategies found in the School Improvement Plan. Professional development activities enhance educator's knowledge within one or more of the following areas: a) expectations, b) curriculum content, c) classroom instruction, d) classroom assessment, e) extra help, f) guidance, and g) the learning environment. The amount of funding allocated for each professional development activity and the funding source is listed for each professional development activity.

Effective Learning Process: The Professional Development Summary was written by teacher-leaders and includes activities that will help teachers develop the knowledge and skills needed to successfully implement the strategies listed in the School Improvement Plan. The plan includes a variety of formats for professional development. Activities have been embedded in the school day as appropriate. The plan also includes activities designed to provide teachers with feedback over time. Finally, "strategy data" is collected for comprehensive strategies that identifies the degree to which the strategy has brought about a positive changes in adult practices.

Professional Growth Environment: Each strategy is supported by a "strategy chair." Strategy chairs are responsible for 1) writing (with support from colleagues) a strategy plan including on-going professional development activities, anti-resistance, and evaluation activities, 2) providing on-going mentoring to their colleagues in the implementation of the strategy, 3) analyzing the effectiveness of the strategy, and 4) making a recommendation to the faculty with respect to whether or not the strategy should be sustained.
